

NEET 2027 — MARKS TO RANK

RESULTS PENDING - NEET 2027 has not been held yet, so no official marks-to-rank data exists. Every figure on this sheet is a projection carried forward from NEET 2025's actual outcomes. Once NEET 2027 concludes, expect the real distribution to drift from this sheet — typically by 10–15% — depending on how tough the paper is and how many students sit for it.

A NEET RANK IS REALLY JUST A POSITION IN A QUEUE: EVERY CANDIDATE IS LINED UP IN ORDER OF TOTAL SCORE, and where you land in that line decides which counselling doors open. This page turns that queue into something you can read at a glance — a visual ladder of scores on one side, a full reference table on the other, and the tie-break rulebook for the rare case two candidates land on the exact same mark.

The Score Ladder

● ELITE (AIIMS-TIER)
 ● TOP GOVERNMENT
 ● GOVERNMENT (WIDER POOL)
 ● PRIVATE / DEEMED

Expected Marks vs Rank Table

MARKS (OUT OF 720)	RANK RANGE	PERCENTILE	COLLEGE TIER
720	1–50	99.99%	● AIR Topper Range
700	50–200	99.98%	● AIIMS Delhi, JIPMER, CMC Vellore
680	200–600	99.95%	● Other AIIMS, AFMC Pune
660	600–1,500	99.87%	● MAMC, VMMC, Top Govt Colleges
640	1,500–3,500	99.70%	● Top State Govt Colleges (KGMU, BHU)
620	3,500–7,000	99.40%	● State Govt Colleges (Top States)
600	7,000–12,000	98.97%	● Govt Colleges (Most States)
580	12,000–20,000	98.28%	● Govt Colleges (Less Competitive States)
550	20,000–35,000	96.99%	● Private / Top Deemed Colleges
500	35,000–75,000	93.51%	● Private Medical Colleges
450	75,000–1,30,000	88.74%	● Below avg Private / Deemed
400	1,30,000–2,00,000	82.65%	● Lower-tier Private

How the Rank Is Actually Decided

Your rank starts with one number — total marks out of 720, added up across Physics, Chemistry and Biology. Almost every candidate is separated by that number alone. It's only when two candidates land on the exact same score that NTA works down a fixed checklist to break the tie.

IN SHORT: score high in Biology first — it's the first, and most forgiving, tiebreaker of all.

- 1 BIOLOGY SCORE** — the candidate with more marks in Biology alone ranks higher.
- 2 CHEMISTRY SCORE** — if Biology is also tied, Chemistry marks decide next
- 3 PHYSICS SCORE** — still tied? Physics marks are compared next
- 4 FEWER WRONG ANSWERS** — across all three subjects combined, accuracy wins.
- 5 AGE** — if everything above is identical, the older candidate is ranked higher.

1 MARK IN BIOLOGY ≈ 10,000 RANKS

Inside the 580–640 band specifically, each extra Biology mark has historically moved candidates somewhere between 8,000 and 15,000 ranks — making Biology accuracy the single highest-leverage place to gain ground in that zone.

Frequently Asked

Q. What rank corresponds to 600 marks in NEET 2027?

Going by past trends, 600 marks has historically landed candidates somewhere in the 7,000–12,000 rank window. A dedicated rank predictor can narrow this further using your category and state.

Q. What's the minimum score for a government MBBS seat?

Recent cycles suggest General-category candidates typically need 620+ marks to have a realistic shot at a government MBBS seat — though the real cutoff swings with the state and specific college.

Q. How exactly is the NEET rank worked out?

Total marks decide rank first. If two candidates tie exactly, Biology marks are compared first, then Chemistry, and age is the final tiebreaker.

ELITE · 680–720 TOP GOVT · 600–660 GOVT · 550–580
